CANCER CENTER

# C.A.F.E. SERIES

CANCER AND COMMUNITY: A FORUM FOR EXCHANGE

Free  
Coffee &  
Snacks

## What to expect:

- Easy-to-follow talk with CU Cancer Center experts
- Time for questions and conversation
- Open to everyone (especially adults in their 50s–60s)

**November 21, 2025**

**10:30 AM - 12:00 PM**

Aurora Public Library  
14949 E Alameda Pkwy,  
Aurora, CO 80012

## THIRD SESSION:

### Pituitary Tumors: From Research to Treatment — New Treatments Ahead

Dr. Maggie Wierman from the University of Colorado School of Medicine will talk about pituitary tumors, which are growths that develop in a small gland at the base of the brain. She'll explain why they form, how they impact health, and share updates on new treatments, including research on a protein called MST4 that could lead to new treatments someday.
